Experts in Microtunneling

Geo Structures, Inc.

Advantages of Microtunneling

- Can Install in any Soil Type
- Minimal Impact on Existing Structures
- Low Environmental Impact
- Minimize Spoils
- Compact Installation
- Increased Worker Safety
- Less Risk of Surface Settlements
- Fast Construction
- Reduced Impact on Ground Water Level
- Less Noise

Applications for Microtunneling

- Combined Sewer Overflow Tunnels
- Crossings Under Existing Services (Roads, Streets, Railways, Rivers, Airport Runways, etc)
- Sea Outfalls
- Water Supply Networks
- Underground Corridors
- Gas and Oil Pipelines
- Drainage Systems
